PROFESSIONAL SUMMARY

An emerging technology advocate, early-signal thinker, and bridge-builder operating at the intersection of emerging technology and inclusive talent pipeline design. Bringing a rare combination of technical experience, pattern recognition across converging technologies, and the ability to translate complex emerging signals into a clear strategy for organizations, programs, and the professionals navigating what comes next.

PROFESSIONAL EXPERIENCE

Founder and Emerging Technology Strategist

04/2024 — 12/2025

TechTrap Global

- Founded and operated an emerging technology education and consulting initiative focused on exposing early and mid-career professionals to AI, quantum computing, blockchain, and other frontier technologies
- Designed and facilitated hands-on workshops giving participants first-hand experience with emerging tech fundamentals — including creating crypto wallets, deploying AI-generated art as NFTs, using AI in conjunction with blockchain for on-chain deployment, and building custom GPTs using the OpenAI platform
- Provided strategic advisory and fractional consulting services to startups and organizations navigating emerging technology adoption, integration, and talent pipeline design
- Connected professionals to apprenticeship programs, Workforce Pell Grant opportunities, and emerging tech pathways.

Front End Developer — AR/VR Innovation Initiative

12/2022 — 04/2024

Truist Financial

- Led an internal Innovation Lab effort to identify and evaluate AR/VR frameworks suitable for the existing engineering team. Selecting A-Frame for its web-native approach and low barrier to entry for JavaScript-proficient engineers
- Prototyped and tested an immersive VR banking environment — exploring how financial services experiences could be reimaged in spatial computing.
- Contributed to early-stage experimentation that positioned Truist's Innovation Lab at the frontier of immersive technology exploration.

Design System Engineer

08/2022 — 04/2024

Truist Financial

- Architected and built reusable web components for the Truist-branded web component library, ensuring design consistency and scalability across product teams
- Contributed to the integration of Amazon Lex (AWS conversational AI platform) with the web component library, maintaining Truist brand standards while enabling familiar, accessible AI-driven user interactions
- Collaborated cross-functionally with product managers, designers, and engineers to define component APIs, usage guidelines, and implementation patterns

Software Engineer

03/2021 — 08/2022

Truist Financial

- Developed proof-of-concept applications for the designers to pitch feature solutions directly to product managers with working prototypes. Focused on accessibility standards throughout all POC development

ADVISORY AND EDUCATION OUTREACH

Advisory Board Member

02/2025 — Present

Central Piedmont Community College · Charlotte, NC

- Advising on curriculum alignment with emerging technologies and workforce pipeline development to ensure programming meets the demands of today's and tomorrow's technical landscape.

VOLUNTEER AND COMMUNITY LEADERSHIP

Apprenticeship Expo Organizer

02/2020 & 11/2022

Katarizo Initiative Group x Leading On Opportunity · Charlotte, NC

- Co-organized two community expos bringing together 46 apprenticeship programs. Spanning both white-collar and skilled trade pathways to expose high school and college-age students to two-year college and alternative career options
- Collaborated with grassroots partners and community organizations to increase awareness of non-traditional educational and career pathways among underserved populations

Community Outreach Volunteer — Digital Divide Initiative

04/2021 — 07/2021

Truist Internal Homepage Program · Charlotte, NC

- Leveraged community connections to support digital equity efforts. Collaborating with nonprofit partners like E2D to distribute laptops and technology resources to local underserved communities to eliminate the digital divide.

EDUCATION AND TRAINING

Full Stack Development Apprenticeship

09/2020 — 03/2021

Road to Hire · Charlotte, NC

- Completed an intensive full-stack development apprenticeship covering the MEAN and MERN stacks (MongoDB, Express, Angular/React, Node.js) — the technical foundation of a career in software engineering and design systems

MIT Professional Education — Applied Data Science Program

09/2020 — 03/2021

Road to Hire · Charlotte, NC

- Completed MIT's Professional Education program in Applied Data Science, focused on data science, using advanced analytical frameworks, and generative AI to make data-driven decisions for the future.
